| Product Information   |
|---|
| Milling salt is a refined, regular grain sea salt, particularly suited for use in fertilisers, animal feeds, and the treatment of animal hides. |

| Physical Characteristics  |
|---|
| Typical particle distribution:  |
| >2.8 mm            0.26%  |
| 2.00 – 2.80 mm    5.70%   |
| 1.00 – 2.00 mm    59.08%  |
| 0.710 – 1.00 mm   18.00%  |
| 3000 – 710 mic    14.26%  |
| <300 mic            2.04%   |
| Analysis carried out on samples collected between 01/12/15 and 31/12/15 |

| Component          | Unit  | Specification     | Typical Analysis |
|--------------------|-------|-------------------|------------------|
| Appearance         |       | White crystalline |                  |
| Sodium Chloride    | %     | 99.00 Min         |                  |
| Moisture           | %     | 0.3               | 0.1              |
| Insoluble matter   | %     | 0.03 Max          |                  |
| Alkalinity         | %     | 0.003 Max         |                  |
| Sulfate            | %     | 0.49 Max          |                  |
| Calcium            | %     | 0.14 Max          |                  |
| Magnesium          | mg/kg | 307.00 Max        |                  |
| Cadmium            | mg/kg | <0.10             |                  |
| Arsenic            | mg/kg | <0.10             |                  |
| Copper             | mg/kg | 2.00 Max          |                  |
| Lead               | mg/kg | <0.30             |                  |
| Mercury            | mg/kg | <0.01             |                  |
| Iron               | mg/kg | 28.00 Max         |                  |
| Anti-Caking (E536) | mg/kg | 15.00 Max         |                  |
