- ✓ Helps maintain osmotic regulation
- ✓ Stops abnormal eating behaviour
- ✓ Helps replenish sodium loss during exercise
- ✓ Salt aids muscle and nerve function
- ✓ Utilise feed better
- ✓ Contains up to 80 trace elements
- ✓ Increases water intake

## Naturally Clean

Sodium is vital for horses as it prevents dehydration, stimulates digestion and improves their bodies ability to absorb minerals and trace elements.

Inadequate salt in the diet can also result in abnormal eating behavior such as licking/eating dirt or chewing objects.

Use of our Himalayan Rock Salt helps balance sodium levels for your horses, and this can only be a benefit for both the horse and the owner.

Delivery Available Nationwide!

HS V3 /18

**Naturally Clean**

Free access to salt for your horse

**Eliminate concerns** regarding how much salt your horse needs  
**A 550 million year old source of minerals & trace elements**

### WHAT IS HIMALAYAN ROCK SALT?

Mined from the vast and ancient Himalayan mountains, these salt licks are one of the purest forms of salt available. Many equine owners across the country have begun giving it to their horses. It is particularly important for horses, as it provides them with a range of vital minerals, with results showing it greatly improves their overall health.

### ROCK HARD & WEATHER RESISTANT

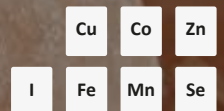

Himalayan rock salt licks are literally rock hard, meaning that your horse is unable to bite bits off the block, a problem that can occur with the softer manufactured salt licks. Himalayan salt licks are also much more weather resistant and will not dissolve into a pulpy mass when left in the rain, meaning they can be safely left outside for your horse to self dose.

### VITAL FOR ANIMAL NUTRITION

On top of a more than adequate nutrient diet with balanced minerals, it is recommended that horses should receive free access to extra salt whether they are performance horses in work or a much loved member of the family in the back paddock.

Sodium Chloride	% m/m NaCl	98
Size	Kg	1-5
Moisture	% m/m	0.12
Calcium	% m/m	0.32
Sulphate	% m/m	1.29
Magnesium	g / kg	0.16
Potassium	g / kg	3.5
Iodine	g / kg	< 0.1
Copper	ppm	0.56
Cobalt	ppm	0.60
Iron	ppm	0.27
Manganese	ppm	0.27
Selenium	ppm	0.05
Zinc	ppm	2.38

Table 1. Typical Himalayan Salt Specification

Copper, Cobalt, Zinc, Iodine, Iron, Manganese & Selenium are all trace elements that have been shown to be beneficial for your animals health.

All year round!
